

PROPOSAL FOR NEW JERSEY'S FOURTH OFFSHORE WIND SOLICITATION

A Joint Venture of:

- Will leverage synergies with Attentive Energy Two to maximize economic development and community benefits
- Over 1.3 GW of clean energy to be delivered to New Jersey
- Enough energy to power over 650,000 NJ homes annually
- Removes 2.1 million tons of carbon annually
- Generates \$15 billion in economic activity statewide over the life of the project
- Up to \$300 million for a Supply Chain Localization Fund that will support in-state manufacturing
- Agreement with seven local unions to develop a Project Labor Agreement
- Committed to marshal at the NJ Wind Port and plans to host all O&M activities in-state
- Aims for no net loss of biodiversity and no net loss of commercial fishing revenue, and a net positive impact to some resources
- Investments across all 21 counties through the \$110M Renewed Legacy investment program

Attentive Energy's proposal emphasizes a statewide commitment that spans all 21 counties and builds upon the success of the Attentive Energy Two Project reflecting an extensive track record of proactive coordination and engagement with local officials, stakeholders and communities across New Jersey.
